

LIVE VIDEO BRACKET

User Guide

How to run Llama Vision, screen by screen — create an account, build a video wall, and let a crowd vote from their phones. 16 → 4 → champion.

1 · Create your account & sign in

Llama Vision is **passwordless** — a passkey (Face ID / Touch ID / Windows Hello) or a one-tap email link. Sign up at www.llamavision.app/signup (you get your **own private workspace**); sign in later at www.llamavision.app/login.

Create your account

Sign up and you'll get your own workspace to run brackets. No password — you sign in with a passkey (Face ID, Touch ID, or your phone).

EMAIL

YOUR NAME (OPTIONAL)

[Create account with a passkey](#)

Rather not set up a passkey? **Sign up with an email link** — we'll email you a one-tap link to get in.

[Email me a link](#)

Already have an account? [Sign in](#)

Sign in

Authenticate with your passkey.

[Sign in with passkey](#)

Or get a one-tap sign-in link by email:

[Email me a link](#)

New here? [Create an account](#) — you'll get your own workspace to run brackets.

2 · Build a tournament

From the control room ([/admin](#)) click **+ New tournament**. Give it a Name and a short lowercase **Session ID** (e.g. **friday**) — that's what the crowd types: [lvote.us/friday](#).

The screenshot shows the Llama Vision admin interface. On the left, the 'Tournaments' page lists a 'Friday Night Finals' tournament with a 'Manage' button. On the right, the 'Create tournament' form is shown with the following fields and options:

- NAME**: A text input field.
- SESSION ID (PUBLIC HANDLE — LVOTE.US/<ID>)**: A text input field containing 'summer-cup'. Below it, a note says: 'Lowercase letters, numbers and hyphens. This is what voters type in.'
- SESSION SETTINGS**: A list of checkboxes:
 - Auto-run (hands-free bracket on launch)
 - Demo mode (fast pace, loops until Stop)
 - Auto voting (simulate votes — no phones needed)
 - API enabled (partner/embed access)
 - Anonymous voting (LVote + key-less API)
- A link: [▶ What do these settings do?](#)
- Create tournament**: A blue button.

3 · The session page (your cockpit)

① Edit settings ② Start auto-pilot / Stop / Start rehearsal ③ Load videos — paste up to 16 YouTube links.

The screenshot shows the 'Friday Night Finals' session page in the Llama Vision admin interface. The page includes the following elements:

- Header**: 'Friday Night Finals' with a 'live' badge, 'Edit', and 'Delete' buttons. Below the title, it says 'session: friday'.
- DISPLAY WALL**: A text input field containing '/display/friday' with a note: '↳ open with autostart (no tap — for kiosk/desktop)'. To the right, **VOTER LINK (LVOTE)** is 'https://lvote.us/friday'.
- Session Controls**: A row of status indicators: 'Auto-run: on', 'Demo mode: off', 'Auto voting: off', 'API: enabled', 'Anonymous voting: on', and an 'Edit settings' button with a red notification badge '1'.
- Start Session**: A row of buttons: 'Start auto-pilot' (with a red notification badge '2'), 'Stop', and 'Start rehearsal'.
- Description**: 'Runs the whole bracket on its own — or drive each matchup manually in the bracket below. Stop halts it and idles the wall.' Below this is a link: [▶ How to run a session](#).
- Load Videos**: A section with a red notification badge '3' and the text: 'Load videos — paste up to 16 YouTube URLs' followed by a green badge '16 loaded' and the text '— see them in the Bracket below'.
- Timing**: A link: [▶ Timing](#).

3 · The session page (continued)

④ Open voting (the per-matchup controls appear as they apply) ⑤ Reset tools. Fewer than 16 clips is fine; a matchup needs at least 2 to open voting.

💡 Did you know?

You can go from sign-up to a live, crowd-voted bracket in about **5 minutes** — create it, paste 16 links, press **Start**.

5 · Put the screens up & run the show

Open the **Display wall** on the TV (or **/launch** with no login). Press **Start auto-pilot** — it opens voting on its own. Here it is mid-vote, with the live tally and countdown.

5 · The winner & the operator's view (continued)

When voting closes the wall **flashes** the winner and advances; on the operator side the bracket shows live counts. Ties are broken at random and shown as "TIE — winner chosen at random."

The screenshot displays a voting interface with four options, each in a separate panel. The top-left panel (A) shows Rick Astley's "Never Gonna Give You Up" with a vote count of 9. The top-right panel (B) shows a cartoon character in a hallway with a vote count of 5. The bottom-left panel (C) shows a scene from the movie "Flash" with a vote count of 3. The bottom-right panel (D) shows a scene from the movie "Funk! Live" with a vote count of 2. A "FLASH" indicator is visible at the bottom left, and "19 votes" is shown at the bottom center.

Option	Image Description	Vote Count
A	Rick Astley - Never Gonna Give You Up	9
B	Cartoon character in a hallway	5
C	Flash movie scene	3
D	Funk! Live movie scene	2

7 · Run it from your phone (operator remote)

Open www.llamavision.app/admin/control, type the Session ID: ① Pause (Resume / Advance now) ② Stop ③ Full console.

8 · Re-run or start over

Open **Reset tools** and pick the smallest: Reset voting (same 16 again) · Reset bracket (re-shuffle) · Reset videos (load a different 16) · Reset everything.

▼ Reset tools

All resets keep the session name and Session ID. Pick the smallest one that does what you need.

Reset voting

Clear all votes + winners, set every matchup back to not-started, and remove the championship round. **Keeps your videos.** Use this to re-run the same tournament (and to get Auto-pilot working again).

Reset voting

Reset bracket

Re-deal your loaded videos into a brand-new 16 → 4 bracket (fresh groupings) and clear all votes. **Keeps your videos.**

Reset bracket

Reset videos

Remove all loaded videos and the bracket. **Keeps the session + its settings.** Use this to load a different set of 16.

Reset videos

Reset everything

Full wipe: videos, bracket, votes, **and** restores default timing + API / anonymous / auto-run settings. Keeps only the session name + ID.

Reset everything
